# GLOBAL LEADER IN COOKWARE

## SINCE 1951

Founded in 1951, Meyer is one of the largest cookware and kitchenware marketing and distribution companies around the globe.

Meyer develops, promotes and distributes cookware and kitchenware from our flagship brands Hestan, Anolon, Circulon, Farberware, Rachael Ray, Paula Deen, Cake Boss, Ruffoni, SilverStone, Racó, Raymond Blanc, Fujimaru, EarthPan, Esstele, Bonjour, and Meyer.

Worldwide, Meyer sells over 300 cookware lines in more than 60 countries producing over 1,50,000 cookware (Pots & Pans) a day and over 45 million per year.

Meyer has a number of cookware and kitchenware manufacturing facilities around the globe.

Meyer product developments and industry innovations include one of the first hard-anodized non-stick cookware lines with a flat interior, hard anodized non-stick cookware with a porcelain enamel exterior, and an induction-suitable line of dishwasher-safe hard-anodized cookware.

All our manufacturing facilities are ISO certified ( 9001, 4531, 9227, 14000, 8442, 8391, 7086 ) and also ASTM certified (C738, B368).

## SAFETY FIRST, MEYER CARES

### USA FDA approved Non-stick coatings

Meyer uses non-stick coatings from Chemours (USA ) & Whitford (USA). These coatings are formulated and quality tested to resist peeling or chipping. In case the cookware is misused (overheated or scratched with sharp utensils) and the non-stick coatings are accidentally consumed, they pose no danger, whatsoever. The non-stick coating particles are harmless, non-toxic and totally inert. If eaten, they pass directly through the body and are not absorbed. In addition, Meyer uses nickel-free stainless steel sourced from Nippon Steel & Sumikin Stainless Steel Corp. (Japan). All our accessories are made of BPA free & zero toxins plastic / silicone.

All our cookware is made from the best quality food grade Aluminum circles from Meyer's own Aluminum Rolling Mills in HK and Thailand. These rolling mills get their raw aluminium ingots from Australia.

The USA FDA & European Food Safety Standards have stated that accidental consumption of non-stick coating particles used by Meyer pose no health threat to humans.
